GreenPlanet™

MEDI ONE

 LIQUID FERTILIZER  BASE NUTRIENT

 VEGETATIVE STAGE

 FLOWERING STAGE

WHAT IT IS

Medi One is our one part base nutrient system formulated with readily available macro and microelements for organic use. Expect vigorous vegetative growth and vibrant floral production with only one bottle.

HOW IT WORKS

Medi One is our complete one part base nutrient formulated for the medical grower. It is a fully balanced blend of all-natural ingredients that produce vigorous growth in the vegetative stage and resinous aromatic flora production in the flowering stage. Our formula contains hydrolyzed fish soluble extract from Atlantic Menhaden that are slowly steamed and hydrolyzed to preserve the amino acids. These are blended with North Atlantic Kelp extract and mined potassium sulphate to provide additional nitrogen (N), phosphorus (P), and potassium (K). Natural humate complexes are also added to increase microbial activity in the grow medium. This helps the plant break down larger organic particles into a size that the plant can easily uptake and use. All of the components within Medi One are carefully assembled to make sure they form a complete and cohesive nutrient source that provides everything the plant needs in all stages of growth.

HOW TO USE IT

Shake bottle well prior to use. Apply the product at a rate of 1-5 ml/L (4-19 ml/Gal) of water twice per week. Adjust pH to the desired levels. Refer to the Medi One Feed Program for application rates during each week of plant growth.
