Understanding the Feed Program: GP3

Topics Covered:

- What is a feed program?
- The "parts" of the GP3 program
- Feeding tips and considerations

GreenPlanet's 3-Part (GP3) feed program consists of a three-part base nutrient system and several additives that enhance both vegetative and blooming growth. Made for the expert grower, GP3 offers plants everything they need in 3 bottles. From essential micronutrients like copper, boron, and zinc, to balanced levels of nitrogen, phosphorus, and potassium, GP3 is fed to plants in varying ratios throughout stages of propagation, growth, and bloom, making them the perfect stack of fertilizer for growers who want nothing but the best. Specialty additives like plant tonics, bloom boosters, resin enhancers, and carbohydrate supplements are also included in all of GreenPlanet's feed programs.

Our New GP3 Feed Program Made Just for AutoPot™ Growers

Topics Covered:

- What is GP3 for AutoPot?
- Benefits for use with AutoPot
- Feed Program Bundles

AutoPot Watering Systems offer a simple to use automatic watering systems that can be used either as a hydroponic system or as a traditional soil irrigation system. It makes indoor and greenhouse growing easy for any grower. When working with AutoPot to learn how our plant nutrients could benefit their growers in the best way possible, we needed to understand what AutoPot users wanted from their feed program. We knew that the grow systems required extremely clean formulas with high-quality ingredients as the source of plant nutrition. We also understood that AutoPot growers wanted nutrient programs that simplified their lives, while still delivering an impressive crop.

These demands led us to develop two brand new nutrient programs specifically for AutoPot cultivators: The 2 Part AutoPot Dual Fuel Feed Program and the 3 Part AutoPot GP3 Feed Program. GreenPlanet Nutrients focuses on pure nutrient formulas with readily available ingredients, making them an essential source of nutrients for any plants.

3 Part GP3 FEED PROGRAM FOR AUTOPOT™

Drain To Waste | Recirculating

LIQUID FERTILIZER

Formulated for the veteran grower, GP3 offers increased flexibility, control and reliability. The GP3 Feed Program for AutoPot™ is formulated for optimum results in AutoPot™ Watering Systems.

FOR USE IN:

SOIL / SOILLESS

HYDROPONICS

DRAIN TO WASTE

RECIRCULATING

FEED PROGRAM CONTAINS

- GP3 GROW
- GP3 MICRO
- GP3 BLOOM
- VITATHRIVE
- REZIN
- PK SPIKE
